New Hampshire Site Evaluation Committee
Docket No. 2015-06
Northern Pass Transmission LLC
Eversource Energy

Pre-Application Public Information Session
Belknap County
September 10, 2015

Fred Lavigne

NAME

407 Diamond Ledge Rd.

ADDRESS

Ctr. Sandwich N.H. 03227

CITY, ZIP AND STATE

DEAR MR. DREW, At the Laconia public info. session I couldn't help notice all the recessed flood lights lighting the room where Northern Pass representatives emphasized the benefits of their plan. I would be more supportive of allowing a project like Northern Pass if all the "low fruit was picked" like having the most efficient lighting and appliances etc, etc, in our homes and businesses.

I'm not a supporter of Hydro-Quebec's impacts on rivers, forest, native peoples land. I don't think it's clean power. I don't think N.H. towns have to host this project so this corporation can make money.

over please →

I was pleased to see burial in the road way thru the W.M.V.F. If this project is allowed at all it should only be buried with as narrow a Row as possible and N.H. should get power at a reasonable price. I don't see support from the general public for this project and it doesn't surprise me because of the way public service started this project. I honestly thought after 5 years it would have gone away by now with so little public support. We installed enough solar panels almost 5 years ago this fall to generate all our power for our home and many other sandwich residents and the town have also. More can be done to conserve and generate local power. Please do what's right for N.H. and don't allow EverSource to run overhead lines from Quebec and only be allowed to bury lines if it helps NH and the environment.

P.S. my dear wife usually spell checks and rewrites anything I write but its a busy time of year for us with work, gardens and volunteering and I didn't want to ask her to do one more thing.

Thanks for listening. Sincerely,

Fred Langner + Evelyn
