

Dear Pamela:

As a small business owner in Northern New Hampshire, I implore you to do whatever you can to stop the Northern Pass from happening. The only business we have left up here is Tourism; and, this will essentially ruin the North Country once and for all.

This is all about the greed of Hydro Quebec and Eversource and does not in any way BENEFIT Northern New Hampshire. Northern pass touts "jobs" - this is laughable as any jobs afforded those of us who live here are TEMPORARY at best.

The towers are unsightly, ruining the beautiful landscape and they bring health hazards as well. I can't imagine any cross country skier, atv or snowmobiler who would want to ride under or near these towers...never mind families with young children living near them.

This whole project is an abomination!

Thanking you in advance for any help you can afford the good folks of the North Country who continue in earnest to eek out a living up here.

Sincerely,

Deb Freedman, Proprietor
