Subject: Northern Pass

Eversource CEO Quinlan is all over media, braying that Eversource has "listened" to NH...well, if they had, they would be burying this for-profit, unnecessary line. NH is already an electricity exporter. We do NOT need this line which would eternally scar the landscape of northern NH.

PLEASE take a drive through northern Coos county, and see for yourself the panoramic vistas which will be forever altered by these metal monsters. Need for electric power CAN AND IS being planned for and provided in ways that will not scar the landscape. Require it of this project. Thank you, Mary Caprio Bearor
