

Eversource surely has not listened to NH. As a land owner on Diamond Pond Road one half mile south of where the proposed route would go arial I invite you to come see what will become of my land AND its value. This project is about the Power of Profit, solely. I surely hope the state will insist on doing the right thing. Burrying the entire line is the only option that should possibly be considered. As land owners we do not deserve to be walked on.
