Hi Timothy,

I would like to be included in all meeting notices, news, etc on the Northern Pass powerline project. Are you the right one to contact? If not, **Could you kindly include me with a cc if you forward this email to anyone and include their capacity?**

I recently read an article in the Record Enterprise regarding this project. Included was a picture showing a view from the top of Ben Young hill looking down the road toward the Clarksville town office - it was stated that the powerline would/could run to the left of the road. I understand that the border crossing isn't yet determined, thus the route isn't definitive.

At this time I would like to strongly state my families opposition to the line running right down the road.

Route 145 is a beautiful and scenic road with rolling hills and fields. People always stop at the roadside pull off at the top of Ben Young Hill (the highest point) to take in the view during the day and at sunset ~ as the sunsets from this point are spectacular! High tension lines would not be at all desirable at one of the many beautiful points along this road.

Thanks very much for your time and any information you can provide, it is much appreciated.
