I'm in Bristol, NH and it goes thru my front yard. The old power lines are there now the taller ones too?!!!! They don't plan on putting the existing one on the taller poles just adding the taller ones. Which means a lot more wires from lower to higher and more noise. Check my place out if you wish(I hope you do). House built in 1810 the barn built 1790. It's nice and scenic. You know New Hampshire Land Of Scenic Splendor. Bury all of it or don't put it in. Thanks Nick Jenkins , Mary Worthen, Eric Worthen, Sam Worthen, Peter and Donna Worthen and many more. Thanks, Nick
