Subject: Hydro Quebec Northern Pass

The route suggested by NP comes close to my town of North Haverhill in Grafton County, veering west of the right-of-way. I wonder why? All of the alternatives mentioned affect wildlife and the environment to a degree that is not reasonable for any **for-profit international** project. No share of the profits are offered to the people of NH. We get a bisected state full of overhead towers and wires. We get a loss of tourism and property values. It is not acceptable.
