

NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

Pass

NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.
