Subject: Northern Pass

To Whom it May Concern:

I would like to leave a comment in reference to the Northern Pass. I would like it to be known that my wife and I fully support this project not only for its clean energy benefits but for its individual impact on the town of Franklin. The tax revenue would almost be doubling the annual property tax for the town of Franklin which would give the town the proper funds needed to improve its public education, improve the resources of the police department to finally eradicate our towns drug problem, and bring a very needed tax relieve for both residents and businesses which would result in even more jobs to be created outside of the Northern Pass construction. We are very excited for the construction to begin and we are very excited for the bright future of the town that we love and decided to grow our family in.

Thank you,

Jackson & Jessica Bregler
