Subject: Norther Pass - NO-

I have seen how utility companies operate. They are an environmental menace. They claim the endangered north Easter cottentail will benefit from this, it's a lie. Thousands of dens will be crushed, destroyed effectively destroying the raptor food sources. All heavy equipment leaks, oil, hydrolic, fuel and grease. This will effect drinking water, don't want another flint MI do we? Bottom line is temporary jobs, destruction of wildlife habitat and poisons being added. No northern pass.
