Subject: Northerh Pass Comments

SEC members,

I urge you to go forward with this project as expeditiously as possible. The project has been vetted and re-vetted too many times and while certain necessary and equitable changes favorable to the dissenters and property owners have been brought forward and addressed in a fair manner the time is now to proceed.

I believe it worthy to note the hypocrisy illustrated by the dissenters of this project. They will argue that scenic NH will be destroyed by this projects transmission lines while advocating and permitting ugly, noisy, endangered specie killing, polluting wind-farms to be built on the very height of land for all to see and hear as opposed to the generally below tree line and horizon transmission lines of Northern Pass. Do you not find it hypocritical that these very same dissenters fell over themselves to approve changes in state law in order to provide the necessary path for the invasion of Dixville Notch? The stripping of thousands of acres of forests on mountain peaks currently enjoyed by residents and visitors alike to build chateaus and ski slopes?

Enough of the red herrings constantly brought forth by the foes of Northern Pass and move on with this essential project critical to NH and all of the Northeast. Due diligence has had its reviews please move forward with positive findings for the progression of this project.

Sincerely,

Rep. Peter T. Hansen
NH House of Representatives
Hills. District 22 Amherst
ED&A Committee
