Subject: Northern Pass

It is imperative that we complete the Northern Pass project. New Hampshire is lagging terribly in its ability to attract new businesses into the state, due to its inability to supply the energy needs of today's requirements. The jobs created by Northern Pass, both short term and long term, will benefit the state for decades to come. Being mindful of residents property and fair in any imminent Domain issues, is imperative. Any project of this magnitude is sure to cause issues among some in its path. Keeping those to a minimum should be our priority, yet, the project **MUST** move forward.
