**Subject:** New Hampshire Northern Pass Project Comments

To Members of The Jurisdictions in Charge:

Here are my comments as requested. Thank you for the opportunity.:

The NP Project should proceed after due environmental impact studies and compliance with all relevant safety and health considerations.

Of particular interest is avoidance of ionizing radiation and electrocution hazard exposures to workers, residents and passers-by.

Economic consideration should be given due to impacts upon businesses and esthetics which draw visitors to the affected areas including rights-of-way.

Thank you again for the opportunity to comment.
