Dear Ms. Monroe,

It is beyond our understanding how a private company and one from a foreign country could even have the audacity to consider creating a visual scar almost the entire length of our State of New Hampshire making a path for towers for the transmission of their electricity and just to promote a money-making scheme benefiting only themselves and expect the population of New Hampshire to permit it.

The *Draft*, NORTHERN PASS TRANSMISSION LINE PROJECT ENVIRONMENTAL IMPACT STATEMENT SUPPLEMENT, dated November 2015, Item 4a clearly offers an alternative to an above ground route suggesting a way following public roadway's right-of-way with complete burial of this cable.

We trust that you will seriously consider this possibility in any decisions you make about this project.

We are yours truly,

William & Anne-Marie Nichols
