

I am speaking tonight as a citizen of NH and more specifically of Concord. I do not want the Northern Pass at all but because our neighbors to the south need more electricity I am willing to support a compromise as long as it is not at the expense of destroying the beauty and tranquility of our beautiful state and its capital city. This is what will happen if the line goes above ground or thru the Right of Way. The destruction of so many trees and the humming of the lines will ruin the surrounding areas, especially in Concord which has the most new towers of any area. Seventy seven new towers are scheduled to be built in Concord destroying farmland, Turtle Pond and passing way too close to homes. For this reason it must be buried along roads and not in the Right of Way. When I heard Bill Quinlan's comment that he wasn't hearing much opposition from people in central and southern NH I contacted my neighbor, Sue Woodard, who had a stop NP sign in her yard and we started the following petition which states:
"We support burying the Northern Pass transmission lines thru the entire state but especially thru Concord where they will be in close proximity to many homes."

We have gathered one thousand, one hundred and two signatures on this petition. Please enter this in the record.

Thank you
Ellen Schaffer
34 Irving Dr
Concord, NH 03301

We support burying the Northern Pass transmission lines thru the entire state but especially thru Concord where they will be in close proximity to many homes.
