Subject: RE: Northern Pass

Hi,

I am against the Northern Pass project as it will still impact NH's natural beauty as the majority of the Pass will be above ground and may come to close proximity to where I live and over 100 condos are located in Concord NH. The increase in jobs will be temporary and the majority of the power will be dedicated to other states! If ALL of the pass can be buried, then further consideration can be given. Has Vermont been considered?

Many thanks,

Janet Carella
