

Dear Ms. Monroe,

Below is another area that I believe is worthy exploring for the SEC members. As with other figures thrown around by the Northern Pass executives, the public has never seen any supporting documentation for Northern Pass/Eversource/PSNH lobbying expenses.

Thank you once again,  
Lee Ann Moulder & Michael Marino

Dear Ms. Monroe,

I feel it is important for the SEC to explore with the Northern Pass executives and their lobbyists why they have spent approximately \$1,088,640 in lobbying costs for the period of time covering 2014 and 2015 per the New Hampshire Secretary of State's records. In stark contrast my research of the Vermont Secretary of State's records reveal that the TDI New England project listed total lobbying costs of \$2,500. If the minimal fees paid by TDI are an indication that a good project speaks for itself, what does it say about the Northern Pass Project Transmission, LLC?
