Re: Northern Pass

I attended the public hearing in Deerfield March 16, 2016. I had to leave at 9.30 before all of the testimony was given, but up to that point I note that all of the testimony supporting the application came from people within the electric industry, with the exception of two elected officials from other communities. I trust that the Committee will take that into consideration in evaluating the public comments. On the other hand, all of the testimony of Deerfield residents, with the exception of one resident who also works in the industry, spoke in opposition to the project as proposed.

I urge the Committee to listen to us and deny the Northern Pass application.

Thank you.

Richard W. Moore
