I am not in favor of even permitting Northern Pass project to exist in this country . For the last forty plus years this country has been crying about not having a viable energy policy to lower our dependence on foreign energy and here we are debating weather we will allow a foreign country to put in a power line that we don't need . I live less than a half mile as the crow flies from the crossing on northside road in Stark . My first concern, is how this is going to affect my health , being so close to a electromagnetic field. My second concern ,is how this project will affect my property value and who is going to reimburse the loss of it.My third concern , is how is this project is going to affect the economy ,tourism is the main source of revenue for Coos county and this project will damn sure be an eyesore ,not promoting tourism . My fourth concern is , how this foreign company can even start this project ,spend all kinds of money on land, community projects ,gifts to different recreation clubs and still claim the project is a go when the project hasn't been approved yet . This whole project breaths of corruption from the bottom to the very top . At the very least, this project if permitted must be buried the entire length and I for one will be petitioning the governor for an investigation into corruption in this project.
