Subject: Northern Pass

Good afternoon,

I am urging you to require Northern Pass to bury the entire line or abandon the project. The recent flip flop by Colebrook and the Balsams Resort is obviously one more attempt by Northern Pass to "buy" support for their project. Without being redundant about all of the reasons against an above ground transmission line (they are all still valid) I think the fact that NP has to pay absurd money to landowners, clubs, towns, and private businesses to get their support speaks volumes. Money talks. What a pity, because after it goes through with all of its attendant evils, it is too late. There has never been a proposed project in our state that has engendered such overwhelming opposition. Yet, it will probably become reality because of the root of all evil- money!
