

Hello Pam

My partner and I own property in Bridgewater and will be directly affected by an overhead line , having a huge negative Impact on our home , we are against the project overall , and am now asking for more time for public review , having only one additional public meeting is unacceptable . With so much strong feeling against this project , the public review process is very important so the people most affected have a chance to be involved and have their voices heard.

Sincerely  
Jim Acher &  
Brenda Garand  
Bridgewater , NH
