RE: Station Abutter Maps

Dear Ms. Monroe,

The Deerfield Abutters have had an opportunity to review the Station Abutter Maps that were posted on Docket No. 2015-06 on July 26, 2016. We would like to submit a few questions to Mr. Bisbee for follow-up. All but two of our questions can be reviewed during a technical session with the applicants, however we will need certain information prior to that session, and current maps of the Deerfield Substation are missing critical information.

Specifically, we request that any new structure in the proposed substation in Deerfield be labeled with a structure number and a rendition of each structure. We also request a chart showing the proposed heights and configuration of each structure. Currently, there is a yellow dot to show that there will be a structure but there is no information about the structures available with these maps.

We realize that it may be beyond the scope of the Newly Adopted SEC Rules, but a 3D cross section of the substation as it would be viewed from the south (Nottingham Road side), west (on Cate Road side), as well as from the north (Bean Hill Road), would more accurately depict the actual impacts of the expanded substation. We respectfully request that the applicant provide such a rendition of the Deerfield substation.

Jeanne Menard is the contact person on behalf of the Deerfield Abutter Intervenor Group. She can be reached at 603-370-8047 or jeanne@paradeproperties.net for any questions or to send responses.

Thank you for posting our requests.

Best regards,

Jeanne M. Menard on behalf of the Deerfield Abutter Intervener Group

Cc: George Dana Bisbee
