To whom it may be of interest

I have been involved with power production since 1962. Oil fired steam plants,  
hydro power, bio mass plants. Worked as an electrician since 1968, held  
master electricians license #511 since 1976 first year required until present.

I have observed northern pass objections, dislikes.  
Nuclear, coal, oil, wind, bio mass, solar is ok but no production nights or cloudy days.

Benefits of Hydro Quebec are constant power, full time, days, nights cloudy days, windless  
days. No pollution. Seems like a no brainer to me.

Sincerely,

[Your Name]
