Subject: Opposition to Northern Pass

To the Site Evaluation Committee,

I am vehemently opposed to the Northern Pass Project! Some of my feelings are based on emotion, but most are based on historical evidence by big businesses' past reputation.

The thing is...I do not believe anything Eversource has to say! I have yet to see a large corporation with millions of dollars to gain care about how careful they are. Once it is destroyed, it is gone. The State of NH will spend millions of taxpayer dollars trying to recoup losses or fix what cannot be fixed. It will go on for years and in the end, the losers are wildlife, the environment, the citizens, taxpayers and future generations. Eversource will still be making money no matter what the negative outcome might be.

We have seen this play out before, the Gulf Oil spill, mountaintop coal removal, fracking, etc. the list goes on and on. We have to be better and smarter. Someday future generations will look back and say, "what were they thinking?"

How will these towers effect tourism, wildlife, water quality, noise pollution, views, run-off, the health and welfare of our citizens. What if you get it wrong???

As a citizen, parent, grandparent, taxpayer, homeowner, environmentalist, I ask you to reject Northern Pass based on all the above reasons. I also ask you to listen to your conscience, morals and integrity. You owe it to the State of New Hampshire. We do not own the earth, it was lent to us by our children.

Thank you!

Sincerely,

Mrs. Meryll F. Goldman
