I am originally from Plymouth, moved south for work and some life opportunities, when i was 24, i grew up working, playing, and living at the mouth to the mountains, and dont see any benefit to the towers. I have no to northern pass sickers in my truck toolbox,etc. Unless we would benefit directly from thr project, then they shouldn't be abloqd to make us pay for it. Its like us building a big project that wouldn't benefit them but making them pay for it, makes no sense. Thabk you preston weaver
