**Subject:** Northern Pass

Dear Ms. Monroe:

For the past several months we have witnessed many individuals along the roadsides from Sugar Hill south to Plymouth with men doing work for the Northern Pass project. Some are surveying and others are either checking elevations or taking boring samples. Although Eversource has promised many benefits to New Hampshire to justify this project, one being jobs for New Hampshire residents, so far we have seen license plates for those contractors from New Jersey, Connecticut and New York. Industrial Hydro is not renewable energy, there are no tax benefits to the towns affected, they still haven't worked out their route, and the jobs are apparently going out of state. These are examples of the lies we are being fed by Eversource. Please do not approve a project designed by a sociopathic corporation that has no respect for the truth.

Peter & Pamela Martin
