**Subject:** SEC Docket 2015-06

To the entire New Hampshire Site Evaluation Committee,

This application was originally filed on 10/19/15 and was deemed incomplete by the SEC on 11/16/15. On 12/18/15 after an extremely suspicious meeting with Governor Hassan out of the public eye and ear, the still incomplete application was mysteriously and inexplicably deemed complete by the committee.

Today, Pam Monroe emailed notes on the technical sessions to the distribution list that includes 7 pages of data/information still needed from the applicant. In light of this I have two requests:

- 1) An explanation from the committee in whole as to how the determination was made last December that the obviously still incomplete application was accepted as complete.
- 2) An accounting of the cost to date for this docket to the New Hampshire taxpayers, including but not limited to: paid hours by committee members, paid hours by state employees, travel expenses, food and beverage costs, venue rentals, security/police usage, road damage/repairs, and advertising/postage.

Thank you,

Cindy Kudlik
