---

This continues to defy the people wishes and bow to big business pressure. This project would forever scar one of our most valuable economic resources, our White Mountain wonders. It is well known by NH citizens that this project will not bring long term employment - those jobs will be for Canadians and short term. This is fossil fuel driven and EverSource is about as money grubbing as you can get. NH will only be a doormat and forever damaged by big business and interests out of state.

STOP this! Listen to the people.

Do everything in your power to not ruin a huge economic resource - tourism in NH.
