Northern Pass has no lasting benefit for the state of New Hampshire. Any jobs will be temporary, Most, if not all, the power will be shuttled " downstream" to lower New England and/ or New York. New Hampshire will be left with permanent ugly scars on her landscape , a landscape that draws much money in as tourism. As usual in matters such as this, the ultimate question is : follow the money. It must be going to someone/ someones with power, it certainly isn't a plan to help the people of New Hampshire .
