Eversource big money is buying its way into NH and destroying valuable economic long term natural resources - our tourism will be forever ruined by short term corporate greed.

If NH doesn't stand up to being bullied by short term business interests, we will be like Quebec with its landscapes scarred by utilities....

NH will not benefit - NH will experience negative economic impact from this scarring. The jobs will not go to NH - Canadians will get the jobs and then go home. The whitewashing by Eversource has to stop. NH must stop Eversource before our assets are destroyed by outsiders.

End this travesty for future generations. No to Northern Pass for once and for all.
