It's time for us to start finding alternative resources and using them for future generations and our planet...I don't understand why and how we have gotten to where we are ..Well actually I do...the rich have been running our country and our politicians and government are part of .it..part of it being that it's not what's best for the people and the planet but what's best for people getting richer and our politicians doing the same...we are all going to die ...no one gets to live forever and when even the rich die they will be exactly like the poor ...cause you can't take it with you..only difference is if u didn't do good when you had the chance to I hope there is a place where you get put till you earn your place in heaven...or whatever comes after this
