**Subject:** Northern Pass

Pamela,

My wife Elaine and I have a house in Northumberland, NH which is a true paradise get away for our two children and us. It is a true paradise because of the natural beauty of the mountains, rivers and streams that sprawl the entire region provide to us that are fortunate enough to know that landscape still exists. We have had many family members and friends visit and they always are amazed at the regions natural beauty and when my wife and I mention the Northern pass the response is always the same. A face of confusion and shock as to why someone or a business would dismantle one of the last places in the northeast to truly enjoy nature. Our children and us feel the same confusion.

We understand the need for cheap electric power and a strong economy and in the end tough decisions have to be made by few on behalf of the many.

Please think of the many that do not know the facts and if they did how would they vote on the matter.

Please take a weekend to visit the region and the path of the Northern pass with your own eyes which may help you make a clear decision with the awesome responsibility you have with this monumental decision.

Thanks so much and we are against the northern pass.  
Brian & Elaine Granville
