I am a resident of Coos County. I hike and ski frequently in the Stark/Lake Christine area and the Nash Stream Forest. The Northern Pass transmission line will be of most benefit to Hydro Quebec. As a resident of Coos County I will not benefit at all. In fact property values near the route of Northern Pass will be reduced and the beautiful forest vistas will be significantly diminished. If the Northern Pass transmission line is to be approved it must only be with the provision that the entire line is buried. Not only would this provide more jobs during construction, it will preserve the scenic vistas of northern New Hampshire and the property values along the route.
