I live in east concord in an area that is still considered rural .. There are many wild life that are all ready being forced to move due to development of new houses. With this pass going threw this area will be too much impact on Mother Nature .. We should concider another avenue of resources that are not so harsh to our wet lands, forest, marshes and the wild life that doesn't have a voice that could be heard, please do not do the pass threw concord New Hampshire. It will be the wrong way to solve this sissuation .
