Subject: No Northern Pass

Please add my name to the list of New Hampshire citizens opposed to the proposed Northern Pass. The beauty of our fragile forests must be preserved! I do not believe there could be any financial gain worthy of the amount destruction to woodland and creatures, including humans by such a project. Our energy sources need to become local sources and greener, like solar farms. This project takes money away from research and development of sustainable energy solutions.

I am willing to testify at the hearings if needed.

Sincerely,

Mary Linda Moore
