**Subject:** Northern Pass is Renewable Energy

What do you want, fossil fuel coal and gas burning to go on forever??

We've stood at the base of the huge windmill in Hull, MA  
Birds flying around. None on the ground.  
Loudest noise cars going by in the street.  
People picnicking and playing on the seashore as the blades swish by.  
Windmills highly visible no one paying any attention.

We've seen smoke billowing up from the Bow Coal Burning Power Plant blowing over I89,.

You choose - coal and global warming vs. visible renewable energy??
