Dear Site Evaluation Committee Members,

Re: Northern Pass!

I am writing to ask you to consider the long term future of our state.

The days of transmitting electricity over long distances from remote power generating sites are waning; localized power generation is more efficient, and is the future of the electrical grid.

If you approve Northern Pass it will provide only a short-term benefit (almost none to us) yet leave a blight on our state forever. The impact on the state due to our image and tourism will hurt our state for generations. Please do not approve Northern Pass without 100% burial. Thank you for your work for the citizens of NH,
Sincerely, Scott Powell
