I have worked in the Electric Utility Industry for 33 years, for two different Utility Companies. I would be all for a project providing Good, Permanent Jobs for our State. This project will provide short term jobs for our people for a Maximum of 2-3 years. After that we are left with the unsightly mess, of not only Monster Towers, but right of ways, access roads, and over-sized Sub-Stations. This is a Truly Beautiful State. I am a Hiker and a back road Motor Cycle Rider. I / We Love the mountains and the back roads of this state. What a Shame it would be to loose all that for 2 or 3 years of work. Our State would be Stuck with the mess for several Life Times to come. Please do not buy into Jobs - Money - Lower Electric Rates...It is all One Big Lie...We are better than that. Tom Clark
