**Subject:** Constituent Opinion re Northern Pass

Dear Administrator Monroe,

As many New Hampshire residents did in the beginning of Northern Pass project, I adorned my property with anti-northern pass signs.

Northern Pass was a bad idea then and is even more of a bad idea now. A non-US company, Hydro-Quebec, desperately wishes to expand its revenue area by selling energy TO SOUTHERN NEW ENGLAND. And Eversource Energy has proven to be a less than competent utility company. The end result is that Northern Pass wants us to believe it will provide NH with great economic benefit when it only provides "construction jobs" and, of course, lower utility bills - which never happens anywhere! We should be investing in clean renewable power; afterall, we have sunshine and wind nearly every day and should utilize these two natural energies. Further, Northern Pass presents a multitude of eyesores throughout our State - a state that depends upon tourism, a state that is well-known for its natural beauty...not to mention its impact on heritage projects.

Sincerely,

Ann Davis
