### CommenterWords

I am writing to oppose the Northern Pass and urge the applicants to consider alternatives that would avoid or minimize to NH, like utilizing existing transportation corridors and burying infrastructure underground, instead of clear-cutting 40 new miles and building new towers.

This project would permanently scar NH's valuable scenic landscape. Many people from MA, including me and my family, travel to NH for that beautiful scenery and escape in nature, and we bring tourism dollars to the state. I deeply enjoy and treasure the undeveloped character of NH and urge you to protect it, as well as the wildlife habitat.

I also encourage you to think of the long term consequences of the project and to perhaps spend more up front to avoid/minimize impact of the project, with positive effects long term for the state and for all of us.

Thank you,  
Liz
