Please deny the passage of the request for the Northern Pass Transmission. The aesthetic beauty of the region will be marred and the pristine landscape will be scarred forever. These features are major components for what makes this region of New Hampshire attractive to so many citizens and visitors. Using imagination and current technology, there have to be alternative means and methods to accomplish the transmission of electrical power. An alternative might be to follow existing Interstate Highways along with burying the cable. Although it will increase the length and cost it will be well worth the initial expense to avoid disfiguring the beautiful terrain, disrupting the natural habitats of the local animals and intruding on the many unique hiking trails.
