I am opposed to the Northern Pass for several reasons, I am an avid hiker and do not want to see our landscape changed forever in this negative way, this will disturb wildlife and the environment and will also have a severe impact on tourism to our community and state as a whole. The impact to tourism will be felt for many years in a community that relies heavily on those tourism dollars for survival. Please consider burying the lines, this will effect the landscape in a negative way at the onset but will allow for long term positive effects.
