I speak against the Northern Pass project as it is currently conceived. I have two strong reasons to oppose this: first, my understanding is that the power transmitted will not necessarily benefit those through whose property the power lines pass, or even other New Hampshireites. Furthermore, the impact on the wilderness has not been adequately considered, to my way of thinking, and one of the reasons to live in and come to New Hampshire is the Great North Woods.

Please preserve our woods and wilderness beauty.

Thank you for considering my position.
