Please reject the Northern Pass. The company has failed to respond to valid concerns that the project will scar the landscape that is a treasure not only in New Hampshire, but across the region. Please do not allow the company to bulldoze ahead with this plan and permanently alter what today is a beautiful landscape. The woods of New Hampshire are a scenic respite for vacationers across the region and country, a natural attraction for tourists, and home to proud locals. Please maintain the beauty of the landscape and do not make the mistake of past leaders who allowed this land to be decimated for profit. Ask the company to bury the lines or cancel the project.
