### CommenterWords

In my opinion, the benefits of Northern Pass to the State of NH in terms of energy and jobs provided is very limited and short-sighted compared to the impact on the state's residents and tourism industry which will be forever impacted by this project.

Considering the investment in lobbying and advertising by Eversource over much of the past decade trying to sell this project to the state of NH, it would seem that it is feasible for them to bury the entire corridor. If it is passed, please request that Eversource bury the entire corridor.
