Deerfield,NH is my home town. The last addition this town needs is the Northern Pass project. In my opinion, Deerfield is a scenic, rural, quiet town with some working farms and small businesses. The Northern Pass Project would do so much damage to our community without any benefits. The huge towers to carry electricity are a blight on the landscape and adding more towers would further erode our scenic views. If NP buried the lines, there would be little, if any protest.

Do the right thing...stop Northern Pass.
