I would like to urge the SEC to push back against the current Northern Pass plans and reconsider less disruptive approaches to tie in these new sources of power.

Though I reside in Mass, my family and I frequently enjoy the scenic beauty of NH's forests, mountains and lakes and I'm deeply concerned about the scar this project would leave on the state's majestic landscapes.

Other projects through NY and VT are more comprehensively burying their lines lessening the impact on the ecosystem.

Beyond my personal enjoyment, for the citizens of NH, I would be concerned on the impact this design proposal will have on tourism and on visitors coming to New Hampshire to experience its relatively undeveloped and remote character.

As a member of the AMC I support their decision, along with 31 out of the 32 communities along the project's proposed path, to oppose this project.

Thank you.
