### CommenterWords

I stand with AMC and the 33 NH communities in opposing the Northern Pass Transmission Project planned to be above ground for two-thirds of the path. I plan to move to NH by 2018 and know that the view of these 155 ft tall towers are not something I'd want to view everyday.

I am a frequent hiker in NH and it looks like the path of these transmission lines are along most of the 4,000 footers in NH, which upsets me.

My first thought of reaching a summit in NH is the view and how untouched it is. It would bring great sadness to see this beautiful state be marked by ugly power lines

While I can appreciate the new job opportunities that would open up for NH residents, the negative impacts outweigh the positives in my eyes.

Sincerely,  
Brittany Langlois
