I support protecting New Hampshire's remarkable scenic landscapes, forests, and trails from the proposed 192-mile Northern Pass transmission line.

If built, the project would have a lasting, negative impact on the overall character of special places across New Hampshire. Towers up to 160 feet tall would mar the scenery from wild and remote northern Coos County to historic Deerfield close to the Massachusetts border.

Please continue to protect New Hampshire and a post/stop this Eversource project.
