Subject: Public comment on Northern Pass

I am opposed to the Northern Pass Project. I live in Concord , New Hampshire, and the plans indicate that the Transmission lines will cross my city and my state. I am directing my elected officials to use the authority vested in them by New Hampshire's people to Stop the Lines from being built.

The beneficiaries of the project are, primarily, the stockholders of various corporations, and , secondarily, power grid consumers in states south of us. There is no worthwhile benefit to New Hampshire citizens or consumers for allowing public and private lands to be used for this purpose.

The feasibility of the the project, the cheap power it will provide, rests on exploiting the State of New Hampshire and its people by deploying a right-of-way for little or nothing in return. Our public officials were not elected, appointed, or hired to make us feel cheap. A serious proposal would include an equal partnership with HydroQuebec, PSNH and other corporate entities for equal sharing of profits, as would any other business partner.

Please protect the interests of New Hampshire consumers and citizens, as your duty requires. Say no to this project.
